YaraMila[®] MINIPRILLS[™] 15-15-15

Professional Grade "Mini" Turf Fertilizer			
Total Nitrogen (N)	15.0%	Avail. Phosphate (P ₂ O ₅)	15.0%
Nitrate N (NO ₃)	6.3%	Soluble Potash (K ₂ O)	15.0%
Ammoniacal N (NH ₄)	8.7%	Sulfur (S)	6.1%
SGN	156		
Derived from: DAP, MAP, Ammonium Nitrate, Calcium Phosphate and SOP			

YaraMila MINIPRILLS 15-15-15 takes sports turf fertility to the next level. It provides complete, high-performance turf nutrition in a new, smaller prill (SGN 156).

The Advantages Are Clear:

- MINIPRILLS is consistently sized to offer more prills per square foot: Even coverage means no color mottling, no burns.
- Homogenous Prills provide no segregation of nutrients, feeding turf accurately and uniformly for even growth-no "hot spots".
- Low irrigation volume is required to water in completely with no need to close the fertilized area for play after application.

Split Nitrogen – Fast Response & Sustained Feeding

MINIPRILLS supplies nitrate nitrogen for quick green-up even in cool weather, and ammonium nitrogen for sustained feeding.

High Analysis

MINIPRILLS 15-15-15 contains 51% plant nutrients! P and K strengthen roots and increase tolerance to drought, disease, and traffic. Sulfur supports proper turf establishment and rich, even and sustained greening.

The information provided is accurate to the best of Yara's knowledge and belief. Any recommendations are meant as a guide and must be adapted to suit local conditions.

Advantages for the Landscape Professional

- Homogenous, dust free prills with ideal N-P-K-S ratio for high performance sports turf.
- "Mini" sized (SGN 156) for very uniform coverage and rapid watering-in.
- High concentration, with 2 types of nitrogen: Nitrate for quick response and Ammonium for lasting feeding.
- Low salt index, very safe for turf.
- Easy and accurate calibration.

YaraMila[®] MINIPRILLS[™] 15-15-15

A CUT ABOVE

Recommendations on High-Traffic Turf:

Established Turf

Broadcast up to 7lbs of YaraMila MINIPRILLS 15-15-15 per 1,000 square feet. Irrigate to dissolve and to incorporate fertilizer into turfgrass rooting zone.
Coverage: 7,500sq. ft. per 50lbs. bag.

Preplant:

Prior to seeding, plugging, or laying of sod, broadcast 13lbs of YaraMila MINIPRILLS 15-15-15 per 1,000 square feet. After planting, irrigate to keep moist until the turf is established.
Coverage: 3,850 sq.ft. per 50lbs. bag.

Overseeding:

Broadcast 5-6 lbs of YaraMila MINIPRILLS 15-15-15 per 1,000 square feet.

CAUTION: Keep out of reach of children and pets.

Suggestions for use

- Apply when foliage is dry and soil moist.
- Apply with well maintained equipment for even distribution and optimum results.
- Water immediately after application to wash foliage and carry fertilizer into the soil.
