# YaraLiva<sup>®</sup> UCAN<sup>®</sup>-23

## Clear Liquid with 3 forms of Nitrogen plus Calcium

Total Nitrogen (N)	23.0%	Calcium (Ca)	4.0%
Nitrate N (NO <sub>3</sub> )	8.0%	Bulk Density	11.45 lbs/gal
Ammonium N (NH <sub>4</sub> )	5.0%	pH	6.0-6.5
Urea N	10.0%		

Derived from Hydrated Ammonium Calcium Nitrate Double Salt and UAN

### Nitrogen

Fast-acting YaraLiva UCAN-23 solution supplies immediately available nitrate nitrogen for quick response and ammonium and urea nitrogen for continued feeding.

### Calcium

YaraLiva UCAN-23 has 4.0% water soluble calcium, an essential plant nutrient. Aside from its role as an important plant nutrient, the calcium in YaraLiva UCAN-23 reduces ammonia volatilization from the urea portion. This significantly increases the N-efficiency of YaraLiva UCAN-23 over UAN-32

The information provided is accurate to the best of Yara's knowledge and belief. Any recommendations are meant as a guide and must be adapted to suit local conditions.

### Benefits

- 3 sources of nitrogen, ideal for sidedressing corn, cotton and wheat.
- Nitrate N for quick start and uptake.
- Calcium reduces ammonia loss.
- Suited to application through all fertigation systems-drip systems, low throw sprinklers, center pivots and spray units.

**Do not mix or contaminate with Phosphate or Sulfate fertilizer sources.**
